📍 India

SUMMARY

I am a dedicated engineering student with a strong foundation in Java, C++, and data analytics. My expertise includes effective data manipulation and statistical analysis. I have developed projects related to online food ordering and airline reservations, showcasing my programming skills with SQL, PHP, and other technologies. My positive attitude and time management abilities ensure my contributions meet team goals

EDUCATION

Bachelor of Engineering

KNS Institute of Technology 📅 10/2022 - 07/2026 📍 Bangalore

Second Preuniversity Degree

St. Anne's Girls PU College 📅 06/2020 - 06/2022 📍 Karnataka

SSLC

Pragathi Composite High School 📅 06/2018 - 06/2020 📍 Karnataka

LANGUAGES

English Native ●●●●● Hindi Native ●●●●●

C++

HTML

SQL

SOFT SKILLS:

Time Management

Effective Communication

Critical Thinking

Team Collaboration

STRENGTHS

Technical and Analytical Skills

Proficient in technical and analytical tasks, coupled with a positive attitude and effective time management skills

Teamwork and Adaptability

Ability to work with diverse teams and adapt to various work environments

PROJECTS

Online Food Ordering System

📅 11/2024 - 12/2024

Ecommerce website

- Developed a robust online food ordering system using React for front end, Notes.js for backend, and PostgreSQL for database management
- Integrated secure payment system with Stripe and implemented real-time order tracking with WebSocket

Airline Reservation Management System

📅 03/2024 - 05/2024

Project aimed at improving customer data management for airline reservations

- Developed an Airline Reservation Management System using SQL for backend and PHP for frontend
- Facilitated easy data management for customers through a Database Management System
